Mario Alberto Reyes De La Rosa

Software Engineer

👤 Profile

Systems engineering student passionate about the backend development, software architecture, design patterns and well written code. I am great at analyzing complex problems and to design solutions in a timely manner. In addition, I consider myself a person with good organizational skills such as: persevering, analytical, reflective, competitive and excellent with teamwork in favor of institutional objectives, and on the personal side I characterize myself as a patient, tolerant and hard-working person.
